DETAILED ACTION

The finality of the previous office action is hereby withdrawn, and superceded by the present office action. Applicant's amendment after final has been entered.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 4, 6 and 31 are rejected under 35 U.S.C. 102(e) as being anticipated by Sixl (6479432).

Sixl teaches a composition which comprises mineral oil, methyl esters of rapeseed oil, and an anionic dodecylbenzene sulfonate salt, which is a wetting agent (see Table 2, compositions 2/4 and 2/3 and definitions in column 17, lines 1-30). The composition also contains Bentone 38, which is a hectorite clay, which would act as a viscosifier and a weighting agent. The Genapol is an alcohol as in claim 6. Applicant's intended use as an emulsion breaker does not distinguish (In re Pearson 181 USPQ 641).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 5 is rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Starch (5888492).

Starch teaches a composition which comprises a mineral oil, an alkyl fatty acid ester, and can contain a surfactant, such as sodium dialkyl sulfosuccinate within the scope of the present invention (see claims 1 and 2). To the extent that Starch may not teach the use of the sodium dialkyl sulfosuccinate as to be instantly envisaged, such would clearly be obvious to one of ordinary skill in the art, given the teaching of Starch of the utility of various sodium dialkyl sulfosuccinates as the surfactant in claim 2.

5. Claim 7 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Claims 3, 11, 12, 14-16, 18-21, 23-27, 29, 32 and 33 are allowable over the art of record.

7. Applicant's amendment and arguments are noted, are are deemed persuasive with respect to Fischer in view of the cancellation of claim 17. New rejections are presented in the current office action.
